

**Step by step to the right color.**

**STANDOFLEET COLOR TOOLS**

**The Art of Refinishing.**

**Competence in color.**

## **Find the right color quickly and reliably with Standofleet Color Tools.**

**Modern color matching needs to be fast and efficient. Only then it is truly cost effective.**

Standofleet Color Tools provide refinishers with efficient tools to get the best result quickly and with outstanding accuracy. In addition to proven and well-known tools such as color cards and Colormix posters, electronic color tools such as Genius, Standowin and online color matching are becoming increasingly important.

The correct mix of aids and tools doesn't just make the painter's work easier. More importantly, it ensures the ability to match the desired color exactly and reliably. So increase your efficiency and your profitability with the right color tools from Standox.

## Digital Color Tools get you to your goal quickly and reliably.

**You're up to date with electronic color tools from Standox – indispensable aids for fast and reliable color determination.**

With Genius, Standwin and Standox's online tools, you have modern methods that work perfectly together. Use the formulation download via the Internet to get the latest information at any time. Measure colors quickly and accurately, directly on the vehicle, with the Genius color measuring device. Manage colors, customer formulations and much more with Standwin color software.

These electronic tools provide you with a complete system, the components of which work in perfect combination and make your work significantly easier.

### **Standwin color software.**

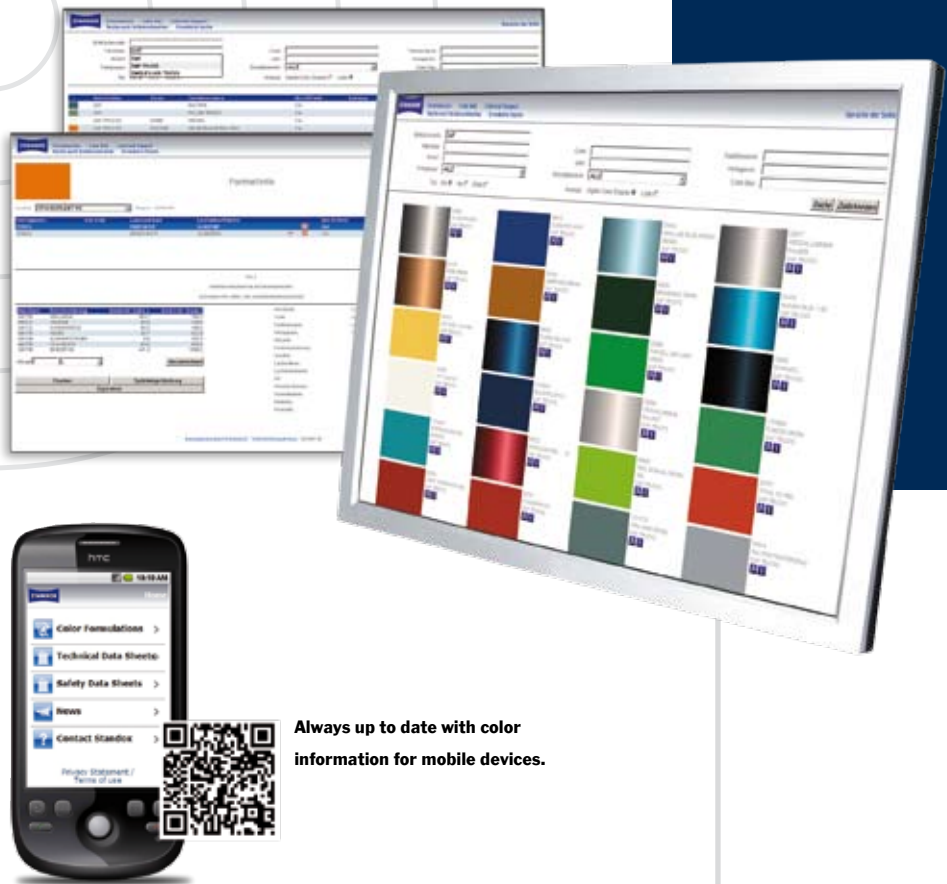

With the Standwin color matching program, you get fast, simple and clear color identifications.

- Multiple search options simplify the fastest way to the formulation.
- Selected formulations can be sent directly to the electronic scales.
- Edited formulations can be saved.
- Display all available commercial vehicle colors on the Digital Color Display.
- Additional functions support order processing as needed and form the foundation of quality and cost management.
- Comprehensive support information (module portfolio).
- User-friendly operation – ideal for touchscreens.

### Color search online.

Color search online – available at the Standox homepage for your country or [www.standex.com](http://www.standex.com) – is an easy-to-use color matching system with formulation downloads from the Internet.

- New “Power Search” (keyword/expanded search) for the fastest results.
- Search screens and result displays are designed specifically for Standwin, avoiding potential mistakes.
- Formulation download from the Internet.
- Always up to date.
- Unique: with Digital Color Display.

Always up to date with color information for mobile devices.

### Genius color measuring device.

The Genius color measuring device allows you to quickly and easily match colors directly on the vehicle.

- Proven triple-chevron technology with additional calibration tile delivers extremely reliable and fast results.
- USB and Bluetooth connections ensure rapid data transmission to Standwin.
- A wrist strap and carrier bag with shoulder strap offers protection for frequent use in the bodyshop.

In good hands:  
the Genius case.

### **Standofleet Color Box.**

With the Standofleet Color Box, you have the most commonly used standard, manufacturer and fleet colors at your fingertips. The 50 x 100 mm color chips are covered with original Standofleet top coats. The color code is printed on the back of each color chip, allowing you to find the proper mixing formula in Standwin without any problems.

- Color swatches with original Standofleet paints on 50 x 100 mm color chips.
- The documentation includes the correct shades for vehicles released in recent years.
- Regular updates.
- Also available: gloss level cards.

## **Proven and reliable – indispensable and professional color tools.**

**Also essential in the digital age: posters and color cards for the entire Standofleet paint system.**

Fast and flexible to use, always available, accurate and reliable – that's what sets the conventional color tools from Standox apart. Color chips painted with original colors, or well-designed posters, are also indispensable aids for quick color matching.

### **Color Hotline.**

Whenever you are not 100 percent sure about the exact color, simply call your local dealer or regional distributor for coloristic support.

**Standofleet Colormix Poster.**

The Standofleet Colormix Poster is an essential instrument for professional color tinting. You can quickly and easily see how the color of your formulation reacts when other Standofleet tinters are added. The Colormix Poster helps you to reliably and accurately tint colors.

- Clear representation of mixed paints with real color shades.
- Assistance for assessing tint mixing behaviour.
- Simple determination of color coordinates by positioning each mixed paint in the color space.

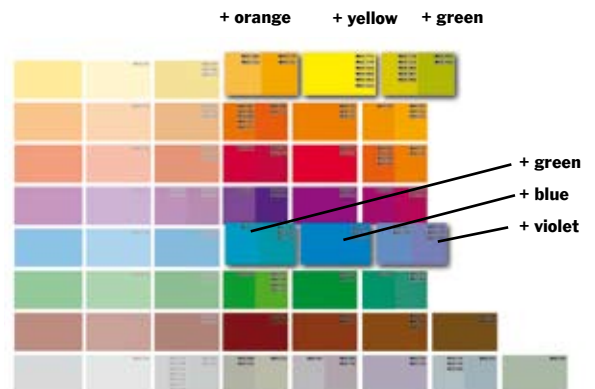

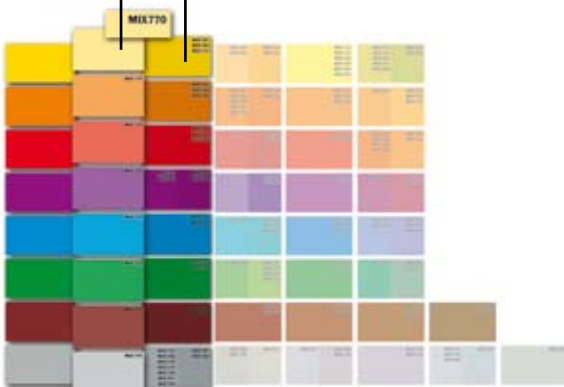

**Color tinting assistance.**

Fundamental colors and mixing sections.

Shows the fundamental color in bright white.

Shows the paint mix that can be used to make the fundamental color darker.

The mixing section shows the development of a color shade when you mix in other Standofleet tinters. This creates opportunities to mix fundamental colors more intensively and to affect their color.
