

Step by step to the right color.

STANDOX COLOR TOOLS

The Art of Refinishing.

Competence in color.

Find the right color quickly and reliably with Stadox Color Tools.

Modern color matching needs to be fast and efficient. Only then it is truly cost effective.

Stadox Color Tools provide refinishers with efficient tools to get the desired result quickly and with outstanding accuracy. In addition to proven and well-known tools such as color cards and tinting posters, electronic color tools such as Genius, Standwin and online color matching are becoming increasingly important.

The correct mix of aids and tools doesn't just make the painter's work easier. More importantly, it ensures the ability to match the desired color exactly and reliably. So increase your efficiency and your profitability with the right color tools from Stadox.

Digital Color Tools get you to your goal quickly and reliably.

Always up to date with electronic color tools from Standox – indispensable aids for fast and reliable color determination.

With Genius, Standwin and Standox's online tools, you have modern tools that work perfectly together. Use the formulation download via the Internet to get the latest information at any time. Measure colors quickly and accurately, directly on the vehicle, with the Genius color measuring device. Manage colors, customer formulations and much more with Standwin color software.

These electronic tools provide you with a complete system, the components of which work in perfect combination and make your work significantly easier.

Online search online.

Online search online – available at the Standox homepage for your country or www.standox.com – is an easy-to-use color matching system with formulation downloads from the Internet.

- New "Power Search" (keyword/expanded search) for the fastest results.
- Search screens and result displays are designed specifically for Standwin, preventing transpositions.
- Formulation download from the Internet.
- Always up to date.
- Unique: with Digital Color Display.

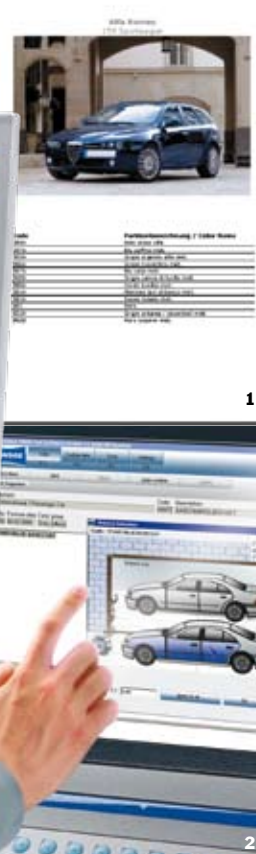

Always up to date with color information for mobile devices.

Standwin color software.

With the Standwin color matching program, you get fast, simple and clear color identification.

- Multiple search options simplify the fastest way to the formulation.
- Selected formulations can be sent directly to the electronic scales.
- Edited formulations can be saved.
- Display all available automotive vehicle colors on the Digital Color Display.
- Additional functions support order processing as needed and form the foundation of quality and cost management.
- Comprehensive support information (module portfolio).
- User-friendly operation - ideal for touchscreens.

Genius color measuring device.

The Genius color measuring device allows you to quickly and easily match colors directly on the vehicle.

- Proven triple-chevron technology with additional calibration tile delivers extremely reliable and fast results.
- USB and Bluetooth connections ensure rapid data transmission to Standwin.
- A wrist strap and carrier bag with shoulder strap offers protection for frequent use in the bodyshop.

**In good hands:
the Genius case.**

1. Notes on color code positioning of all vehicle types in the Standwin Color Info.

2. EX² PCs with touchscreen available for mixing rooms.

Standex Color Box.

The sturdy metal box contains a summary of the European and Asian vehicle colors that have variants.

- Colors reproduced with original Standox paints on 35 x 90 mm color chips.
- The documentation includes colors for recently released vehicles.
- Regular updates.

Barcodes on the back of the color chips make it easier to transmit the data to Standown.

Proven and reliable – indispensable and professional Color Tools.

Also essential in the digital age: Posters and color cards that cover all of Standox's paint products.

Fast and flexible to use, always available, accurate and reliable – that's what sets the conventional color tools from Standox apart. Color chips painted with actual colors, or well-designed posters, are also indispensable aids for quick color matching.

Standex Color Box OEM Basic Edition.

The basic edition of the Standox Color Box consists of handy color fans that provide an overview of all OEM colors for European and Asian car brands.

- The latest colors are sorted by manufacturer and color code.
- The documentation includes the colors for recently released vehicles.
- Regular updates.

Color Hotline.

Whenever you are not 100 percent sure about the exact color, simply call your local dealer or regional distributor for coloristic support.

Color Box for add-on components and interior colors.

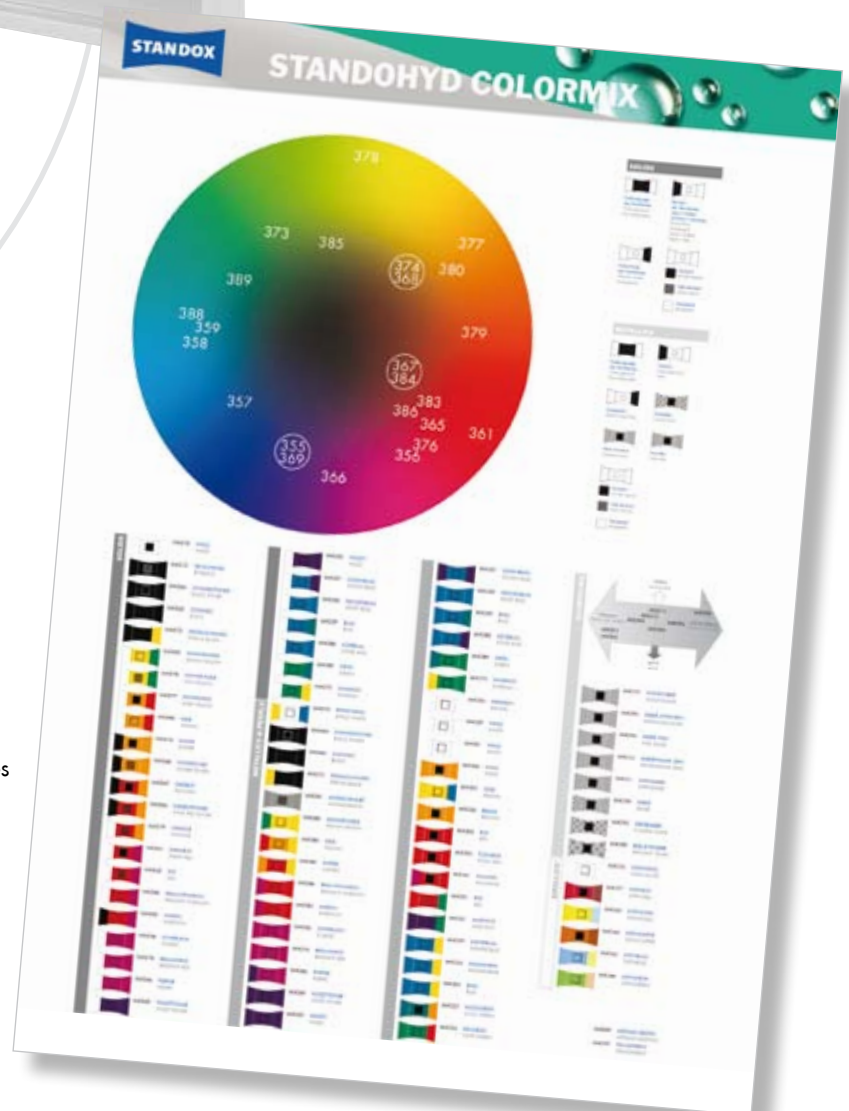

Get the right color on the first try. The Color Box add-on offers comprehensive color documentation for components and interior colors in a small Color Box.

- Add-ons: approx. 600 shades sorted by car brand.
- Interior colors: approx. 900 colors sorted chromatically.
- Barcode on the back to facilitate direct entry into Standwin.
- Regular updates.

Standex Colormix Poster.

Whether Standohyd or Standox Basecoat, there are color posters available for all Standox paint systems that clearly present each paint mix with a description and individual color characteristics on oversized Colormix Posters.

- Mixed paints are clearly organised into groups: Solids, Metallics, Pearls and Aluminiums.
- Assistance for assessing tint mixing behaviour.
- Simple determination of color coordinates by positioning each mixed paint in the color space.
